PERCUSSION ELECTRONICS SYNTH CARTS

The **FC Design Corps** Electronics Carts are designed to protect your valuable keyboards, soundboards and rack-mount electronics. Each cart is built with multiple layers of shock absorption, starting with 8” foam filled casters. The floating 12U rack cubes are mounted with high-density vibration reducing spacers and come standard with rear rack rails. The top and bottom decks are covered with resilient all-weather carpet. All carts feature front and rear access panels. The mixer carts also have a removable side-access panel. The carts are hard-wired for AC power and have access ports for Speakon and 1/4” lines out. The carts are fully enclosed for secure transport.

FCSYNTH-X: Enclosed Synth Cart

FCSYNTH-X12: Enclosed Synth Cart with 12U rack

Features: Steel construction; Heavy duty hardware; 1 1/2 ” accessory rail on both Mixer & Synth carts; 8” industrial flat-free casters; Swivel-lock casters for easy steering; Gloss black powder-coat frame with ABS siding; Universal mounting plate for Speakon and 1/4” cable-outs; Reinforced lid/front/side panels; AC power inlet.

Accessories/Add-ons are available for FC Design Corps products.

All **FC Design Corps** Products are made in the USA and come with a limited 3-year structural warranty.
